> **How to order:** quote the product code shown under each item to your ASC representative or contact our trade counter. Working loads, line pulls and capacities are the manufacturer's ratings — always select equipment rated above the load you intend to move, check that the tow ball, coupler and trailer are matched and within the towing vehicle's rated capacity, and inspect straps, cables and hooks before every use. Marine switchgear also appears in the ASC Switch Catalogue. Prices are on your current trade price list and are not printed here.
