How to order: quote the product code shown under each item to your ASC representative or contact our trade counter. Many tools in this range are engine or make specific — check the engine codes and applications quoted in the description against the vehicle before ordering, as a tool for one engine family will not fit another. Piece counts, drive sizes and capacities are as supplied by the manufacturer. These are workshop tools intended for trained technicians; follow the correct service procedure and torque figures for the vehicle. Prices are on your current trade price list and are not printed here.
