How to order: quote the product code shown under each item to your ASC representative or contact our trade counter. The badge under each item is the trade pack size — green for a multi-pack or set, amber where the code is supplied singly. Never fit a fuse of a higher rating than the circuit was designed for: match the amperage and the fuse type to the original, and check the blade width, as standard, mini and maxi blades are not interchangeable. Prices are on your current trade price list and are not printed here.
